

Introduction to updated IHSG website

The website is based on a content management system that offers its users various interpersonal services. The main purpose of the portal is to inform about new activities in the International Herbage Seed Group. In addition, users can draw inspiration from a new publication list and last but not least, users will be able to find colleagues in other parts of the world sharing the same interests.

You can log into the website via the menu link 'Free member login'. If it is the first time you enter the site or if you have forgotten your password you can 'Request a new password'. If you are not a member of the International Herbage Seed Group you can sign up as a new member.

Once logged in

Once you have logged into the website you can edit your user information via the menu link 'My member details' – click the 'Edit' tab. Here you can update your own information including location on Google Maps, add a new picture and/or update your profile information. Furthermore, you can edit your newsletter subscription in the tab 'My newsletters'.

Please note that in the process of moving all user data from the old IHSG site database to the new one, some user data have not been transferred correctly - especially users with special characters in their addresses are asked to check and update their contact information if necessary.

All IHSG members have the option of adding new publications to the IHSG publication list. Click 'Create Content' and select Publication in the list and fill in the requested information.

If you have any questions to operating or navigating around the website, please do not hesitate to contact the webmaster (link in the lower right hand corner of the website).
